

LW32

Universal Change-over Switch

1. General

Universal change-over switch of LW32 series is mainly applicable to circuit with alternating current of 50Hz~60Hz, rated operational voltage not more than 380V and DC voltage not more than 220V for remote control or transformation of power distribution equipment, it can also used as change-over switch of various electrical measuring meter and servo moto. Standard: GB 14048.5 IEC 60947-5-1.

2. Type designation

2.1 Type of master control

3. Others

3.1 Category

- 3.1.1 There are three kinds, including main circuit switching, direct control of the motor and master control according to applications;
- 3.1.2 There are three types including location, self-rehabilitation and location self-rehabilitation according to operations;
- 3.1.3 For sessions of the contact system , locations are 1-8 section, self-rehabilitation are 1-3 section and direct control of motors are 1-6 section;
- 3.1.4 There are four types including 30°, 45°, 60°, 90°according to operating angles;
- 3.1.5 Four types according to panel shape and size (see Table 3).

4. Overall and mounting dimensions

5. Ordering information

When ordering, the user shall use complete model of switch.
For example: Order universal change-over switch LW32, type
of wiring diagram is 100 sets. Order code: LW32-20/D303/2
100 sets.
