

Part No.: 01890

Connector latch with brace terminal 150 - 300 mm²

Terminal for aluminium and copper cables

Product Advantages :

Terminal with captive terminal screws, conductor can be overreached,
nominal cross-section and tightening torque marked on terminal.

Standards :

IEC / EN 60439-1

Electrical Data :

Surge withstand strength 80 kA
current carrying capacity of contact 630 A

Mechanical Data :

Width x Height x Depth (mm): 38 x 51 x 86
Weight (g): 366
terminal space 32 x 25 mm
tightening torque 30 Nm

Material Characteristics :

Terminal body:

galvanized steel, chromized

Screw :

hexagon socket screw, galvanized, chromized

connecting latch :

CU-press part

Remarks :

Component connection latch
useable in place of cable lug

Allows connection of the following cable qualities:
stranded round and sector-shaped conductors in aluminium
and copper, in cross-sections from 150 to 300 mm²
